

High tech perfectly integrated

Hamm, 18. March 2014 – Whether in sophisticated offices or conference rooms, in living areas or in the hotel lobby - micro-switches from MICROSENS form the basis for reliable, professional IT networks in buildings of all types. Solutions from MICROSENS not only fulfil all technological aspects of network security and performance. As a technology leader, MICROSENS is also aware of its responsibility for achieving attractive, harmonious integration of technology from an architectural standpoint.

The extensive range of MICROSENS installation accessories integrates the high-tech switches discreetly and elegantly in walls, furniture, panelling, cable runs and sub floor tanks.

The installation components from MICROSENS are available as standard in pure white, silver and anthracite. Special colours are possible, as is implementation of very exacting special requests.

About MICROSENS

Since 1993, MICROSENS GmbH & Co. KG has been standing for fiber optic solutions. As one of the pioneers of fiber optic transmission systems, the internationally active company covers all performance sectors of fiber optic technology. Starting with solutions for future-proof office networking and high-availability in rough environments, the product portfolio ranges from large-scale site networking and interconnection of computing centers up to high-performance Wide Area Networks (WANs). In all these fields of application, MICROSENS provides and ensures efficient, fast, and secure data transfer. As an internationally successful manufacturer, MICROSENS distributes its products on a worldwide scale. In addition to the company headquarters in Hamm in Westphalia (Germany), MICROSENS also has sales subsidiaries in France and Poland to optimally fulfil the diverse requirements of its customers on-site.

About euromicron

euromicron AG is an all-in solution provider for communications, transmission, data and security networks. The network infrastructures of euromicron integrate voice, image and data transfer in wireless mode, via copper cabling, and by means of fiber optic technology. euromicron develops its market-leading applications, such as security, control, health care or surveillance systems, on the basis of these future-safe network infrastructures.

Based on the competence as a developer and manufacturer of fiber optic components, euromicron AG constitutes a company group with a strong growth and revenue potential. The company is listed at the stock exchange and is marked by its nature as a medium-sized enterprise. It focuses on operative growth, integration, as well as on market penetration, internationalisation, and expansion. Further information at www.euromicron.de
