

## Press release

### euromicron presents “Advanced Security Solutions” at Security Essen 2016

**Customised protection concepts and smart services for  
people, buildings, data, and objects**

**Frankfurt / Main, 18 August 2016.** Under the slogan “Advanced Security Solutions”, the euromicron Group is premiering its solutions for innovative and networked security technology at Security Essen, the world’s leading trade show for civil security and fire prevention technology, from September 27 through 30. It will showcase digitised solutions and concepts for today’s and tomorrow’s security technology at **Stand 2A18 in Hall 2**.

Security systems of the future are IP-based and networked intelligently. Video surveillance, fire alarm systems, or access control no longer stand unconnected alongside each other, but are digitised and integrated in unified, highly available overall systems. Key word: Internet of Things (IoT). It boasts enormous potential for optimisation which we are focusing on opening up together with our customers. The combined expertise of the euromicron Group enables tailor-made, innovative all-round solutions for all current and future security requirements. Four euromicron subsidiaries will present holistic smart services for users in all sectors and of all sizes in Essen. Their presence at the trade show will focus on the topics:

#### **Smart video surveillance**

Holistic solution concepts from the fields of video surveillance, video analysis, and risk/building management are the focus of euromicron Deutschland GmbH. Visitors can learn how incidents from the various existing security facilities and information systems can be managed centrally.

#### **Mission-critical IoT**

telent GmbH, as a full-line system integrator and network specialist for enterprise and security-related communication, will present its innovative portfolio of IoT wireless solutions based on the radio standard **LoRa®**.

#### **Robust networks**

Robust, highly available network infrastructure solutions from MICROSENS GmbH & Co. KG ensure maximum reliability within the fields of security and video surveillance. Apart from high-performance Gigabit switches, solutions for powering LED lights via PoE and IP-based audio systems will be presented.

## PA/GA/intercom systems

ProCom Professional Communication & Services GmbH will present intercom/public address systems, integrated central announcement systems for rail, local public transport, and industry, and IP-based emergency call systems for transport companies, public institutions, and industry. The product portfolio is rounded off by ProCom terminal devices and loudspeakers for professional use in harsh ambient conditions.

You can find information on the companies' presence at the trade show at <https://www.euromicron.de/innotrans-security-2016>. Anyone interested can also arrange an individual consulting meeting with the experts on site and register for a ticket to the trade show.

### About euromicron AG:

euromicron AG ([www.euromicron.de](http://www.euromicron.de)), a company that unites medium-sized high-tech companies from the fields of Digital Buildings, Critical Infrastructures and Smart Industry. As a German specialist for the Internet of Things, euromicron enables its customers to network business and production processes and successfully move to a digital future. From design and implementation, operation, to related services – euromicron implements customized solutions and creates the IT, network and security infrastructures that they require. As a result, euromicron enables its customers to gradually migrate existing infrastructures to the digital age. euromicron's expertise helps the company's customers increase their agility and efficiency, as well as develop new business models that lay the foundation for commercial success down the road. The technology group is headquartered in Frankfurt/Main, has been listed on the stock exchange since 1998 and employs around 1,800 people at 30 locations. The euromicron Group comprises a total of 14 subsidiaries, including the brand names Elabo, LWL-Sachsenkabel, MICROSENS and telent. euromicron AG generated total sales of €345 million in fiscal year 2015.

### About euromicron Deutschland:

euromicron Deutschland GmbH ([www.euromicron-deutschland.de](http://www.euromicron-deutschland.de)) is a subsidiary of euromicron AG. With the company headquarters in Neu-Isenburg and a network of subsidiaries throughout Germany, euromicron Deutschland is one of the leading German systems integrators on the future market of the Internet of Things. The business activities focus on all-in solutions beyond industries in the area of intelligent building technologies (smart building solutions) from the sector networks, IT security, telecommunications, and security systems. The customer base includes renowned network operators and energy suppliers, private companies from the sectors of transport, logistics and traffic, companies of the public sector and civil service, institutions and agencies on the health sector, banks and insurance companies.

### About MICROSENS:

Since 1993, MICROSENS GmbH & Co. KG ([www.microsens.de](http://www.microsens.de)) has been standing for Fiber Optic Solutions. As one of the pioneers of fiber optic transmission systems, the internationally active company covers all performance sectors of fiber optic technology. Starting with solutions for future-proof office networking and high-availability in rough environments, the product portfolio ranges from large-scale site networking and interconnection of computing centers up to high-performance Wide Area Networks (WANs). In all these fields of application, MICROSENS provides and ensures efficient, fast, and secure data transfer. As an internationally successful manufacturer, MICROSENS distributes its products on a worldwide scale. In addition to the company headquarters in Hamm in Westphalia (Germany), MICROSENS also has sales subsidiaries in France and Poland to optimally fulfil the diverse requirements of its customers on-site.

### About ProCom:

ProCom Professional Communication & Service GmbH ([www.procomgmbh.de](http://www.procomgmbh.de)) is an innovative company of the communications industry. The company develops, manufactures, projects, and distributes communications systems with widely distributed applications, including the corresponding software and services. The company provides a network of representatives and partners over almost the complete globe, who can respond quickly and efficiently to the requirements of their customers. This results in an export share of approximately 30-40%.

### About telent:

telent GmbH – a company of the euromicron group – ([www.telent.de](http://www.telent.de)) is a vendor-independent provider of solutions relating to networks and systems for critical infrastructures as well as operational and security-relevant communications. The company supports its customers in the design, planning, installation, integration, operation, and maintenance of advanced, comprehensive services. Focal points are IP technology for operational networks, PMR solutions, as well as network and asset management. telent can draw on highly-qualified employees on the sites Backnang, Teltow, and Radeberg, as well as in ten further subsidiaries throughout Germany. The customer base consists of institutions and companies, particularly from the sectors railway transport, traffic infrastructure, energy supply, IT, and telecommunications.
